

Global HotSpot In A Box

Wireless HotSpot In A Box (HIBox) is a turnkey solution for Wireless services. As a self contained independent unit the box can be deployed virtually any where in the world. This offers Telcos, ISPs other Service Providers the ability to enter new markets at a minimal cost, engineering (expertise), and risk. The system is fully re-deployable. If the service provider finds the market not viable or the equipment improperly placed, they can easily move it, without fear of contracts from upstream service providers.

The HIBox unit contains the following:

- High-end, high capacity Level 2 Switch that is fully and remotely manageable
- Telco-rated switch that will allow rapid deployment of Voice Services
- 48v Power Plant
- Heat Exchangers or HVAC
- Solar/Propane Panel (for use where local power utility services are not available)
- Environmental Enclosure
- Satellite DMARC
- 45Mbps Internet Access availability
- High Touch IP Services (VPNs, Firewalls, NAT, Routing)
- Global LAN 2450
- Wireless CPE and Base
- Cable Management System
- NEMA Enclosure with variable user switches and wireless technology
- Back-up Power

Global HotSpot In A Box

Built for rugged and challenging environments, the HiBox can also be used by Disaster Recovery and/or Rescue Teams, allowing rapid deployment of a high-speed network.

It's high-speed satellite connectivity is running via IP MPLS (Multi-Protocol Label Switching), the most reliable and secure IP transmission for a widely dispersed area, which means secure information can be transmitted from anywhere around the world at any given time.

The HiBox supports the deployment of the following integrated services in a single system:

- Wireless (Fixed/Mobile) Internet Access
- Voice over IP for fixed services
- Voice over Wi-Fi for Mobile Services
- Video over IP for monitoring and/or Conferencing Services
- Digital Soldier (Rapid Deployment of Force with complete mobile communications system equipped with GPS, Video, Voice, Wireless Location with Blue Force Tracking and Targeting Systems)

Digital Soldier: For military applications, the system can be airlifted and dropped in any area or theater to coordinate troop movements and/or direct the battlefield.

To Order by Phone Call (941) 744-2511 or (877) 744-2GWST

You can reach our telephone representatives Monday – Friday, 8:00am to 5:00pm, EST
