

GWST Enters Into A Multimillion Dollar Alaska Project

April 2007

GWST signs an agreement for a multimillion dollar network infrastructure project in Alaska. To date, the infrastructure for 3 rural villages has already been installed and will be tied in to the nationwide backbone. The project will be implemented in multiple phases and the first phase has just been provisioned to ULU Telecom for network management and handling of all billing, tech support and a 24/7 Call Center service. The Call Center itself is also an Alaskan Company.

The Project is expected to attract a minimum of 30% from the rural communities' population.

GWST has also implemented 90% of Department of Corrections network in this State with the remainder of the project scheduled for final certification by mid-2007.

About GWST

GWST is a Florida Corporation with headquarters in Bradenton Florida. Global Wireless Solutions was incorporated May 2003.

GWST is in the business of commercializing its technology and services worldwide. GWST provides a full line of wireless products to meet every bandwidth requirement. Our products utilize various Radio Frequencies depending on the customers' applications.

GWST has developed a team of professionals that have worked in the industry and are quite familiar with the product lines. Their goal is to generate sales, maximize growth, and strive for profitability. GWST will accomplish this through the synergy of all the team-members' efforts.
